SUMMARY

Full-stack web developer and B.E. Information Technology student who builds and ships complete products, from an interactive Python code visualizer to a SaaS analytics platform with one-click WhatsApp payment reminders. Hands-on with JavaScript (ES6+), React, Python (Flask/FastAPI), REST APIs and SQL, backed by internship experience in frontend development and data analytics. Seeking a Web Developer / Full-Stack Engineer role.

TECHNICAL SKILLS

Languages	JavaScript (ES6+), Python, SQL, HTML5, CSS3
Frontend	React.js, Responsive Design, Reusable UI Components, DOM Manipulation, HTML5 Canvas
Backend & Data	Flask, FastAPI, RESTful APIs, MySQL, SQLite, WhatsApp API Integration
Tools	Git, GitHub, VS Code, Web Analytics, Data Visualization

PROJECTS

Bublops: SaaS Investor & Borrower Analytics Platform

Live Demo

Full-Stack · JavaScript · Web APIs · SQL

- Architected a full-stack SaaS platform where investors manage borrowers, loan amounts and goal milestones from a single dashboard.
- Built real-time analytics that compute total capital invested, yield, balances and due dates, giving investors an instant view of portfolio health.
- Shipped a one-click **WhatsApp Nudge** that auto-generates payment reminders with the exact due amount and delivers them to borrowers on WhatsApp, replacing manual follow-ups.

CodeToAnim: Interactive Python Code Visualizer

Live Demo

Python · JavaScript · HTML5 Canvas · CSS3

- Built a web app that animates algorithm execution step by step (e.g., array changes in binary search and sorting) so learners can see exactly what each line does.
- Designed a custom rendering engine that updates visual array boxes in sync with line-by-line code execution.
- Added play, pause and step-forward controls to inspect memory and data-structure state at every step, making Data Structures & Algorithms easier to learn.

EXPERIENCE

Web Development Intern

3 Months

FluffWalks · Frontend & UI Development

Remote

- Built responsive, reusable UI components that improved layout consistency and accessibility across browsers.
- Worked with a cross-functional team to connect the frontend to backend REST APIs for smooth asynchronous data loading.
- Optimized asset rendering and page performance across mobile and desktop screen sizes.

Creative Data Analyst

3 Months

Bublnet · Data Analytics & Visualization

Remote

- Built visual analytics dashboards to track user-engagement metrics and business trends for the platform.
- Converted raw, unstructured data into clear reports and insights that supported operational decisions.
- Automated data-cleaning with Python scripts, streamlining reporting workflows.

EDUCATION

Universal College of Engineering

2024-2028

B.E. in Information Technology · SGPA: 8.3 / 10

Maharashtra, India

Coursework: Web Technology, Database Management Systems, Data Structures & Algorithms, Object-Oriented Programming
